

Decisionⁱ
on the approval
of a carbon-credit Category
Decision number:
VCS_VM0050_v1_2025

The Governing Board considered the Evaluation Report and the Recommendation from the Standards Oversight Committee and decides¹:

- a) The Category/Categories meet(s) the relevant criteria and requirements for CCP-approval
 - **VM0050 - Energy Efficiency and Fuel-Switch Measures In Cookstoves v1.0 applied under the Verified Carbon Standard (VCS), where:**
 - i) the default fNRB value from the latest version of CDM Tool 33² is applied for emission reductions achieved on or before 31st December 2025 or
 - ii) the Source of data for fNRB in mitigation activities is from the MoFuSS model as per CCP Eligible Program approved project documentation

and where:

- Fuel consumption is determined either by using a Kitchen Performance Test (KPT) or Controlled Cooking Test (CCT), or methodology default values with cross checks on fuel savings and
- For charcoal projects, a direct charcoal emission factor (which may include production emissions) or a wood to charcoal conversion factor of four to one is used

¹ This is in no way an assessment of or Decision in relation to any identical or substantially similar methodology used in a compliance system in respect of which this methodology is used.

² The Clean Development Mechanism is under the Kyoto Protocol, but its published methodologies and Tools are public goods and are commonly used by other carbon-crediting programs (e.g. Gold Standard, Social Carbon and Verra). Once in use by another carbon-crediting program (including in an unchanged format), a CDM methodology or Tool is considered to form part of that carbon crediting program's program documents, through incorporation by reference. Assessment under the ICVCM for adherence to the CCPs and Assessment Framework in no way constitutes an assessment of the CDM itself by the ICVCM.

Note: The Governing Board observes that the Paris Agreement Crediting Mechanism (Article 6.4) supervisory body is reviewing CDM methodological tools and methodologies, including CDM Tools for potential use in the PACM. The ICVCM will closely monitor those processes and expects CCP-Eligible Programs to remain informed about that work and review and/or revise the use of these tools, as appropriate.

ⁱ Notwithstanding any other term or provision of the Assessment Procedure, the Summary for Decision Makers, Assessment Framework, Definitions or the Terms and Conditions, the Integrity Council shall have no liability whatsoever (and whether contractual or noncontractual) arising out of or in connection with the implementation, application or operation of the Assessment Procedure, related documents and/or the carrying out of any Assessment, the completion or outcome of any Assessment or the use of or reliance upon any Assessment by any person including, but not limited to, the labelling/tagging or failure to label/tag any carbon credit (or the suspension or termination of such labelling/tagging) or otherwise howsoever arising. Any Assessment is wholly dependent upon information and documentation provided by the applicant carbon-crediting program (for which the Integrity Council has no responsibility or liability). Any Assessment is an opinion, not a statement of fact or a recommendation. No contract, express or implied, exists between the Integrity Council and any person in respect of any Assessment, other than the applicant carbon crediting program under the relevant Contract. No representation, warranty, undertaking or assurance, express or implied, is or will be made by the Integrity Council, its affiliates, associates, advisers, directors, employees or representatives or any other person as to the truth, accuracy, completeness, correctness or fairness of any Assessment.
